Executive Overview

The challenge of managing work as an organization grows

Where work is managed today

- Verbal instructions
- WhatsApp / messages
- Spreadsheets
- Emails
- Manual follow-ups
- Separate reports

What management loses sight of

- Who** — is responsible for a task
- Start** — whether work has started
- Deadline** — whether deadlines are being met
- Delay** — why work is delayed
- Focus** — what employees are working on
- Report** — whether daily updates are submitted

As tasks and employees increase, these scattered methods make it hard to see the full picture. Management spends valuable time chasing updates instead of leading the business.

PROPOSED SOLUTION

One central system for the complete workflow

The **Work Assignment & Management Tracking System** lets management assign work, follow progress, spot delays and review daily employee reports — all from one place, built for a team of around 10 people.

ASSIGN

TRACK

MONITOR

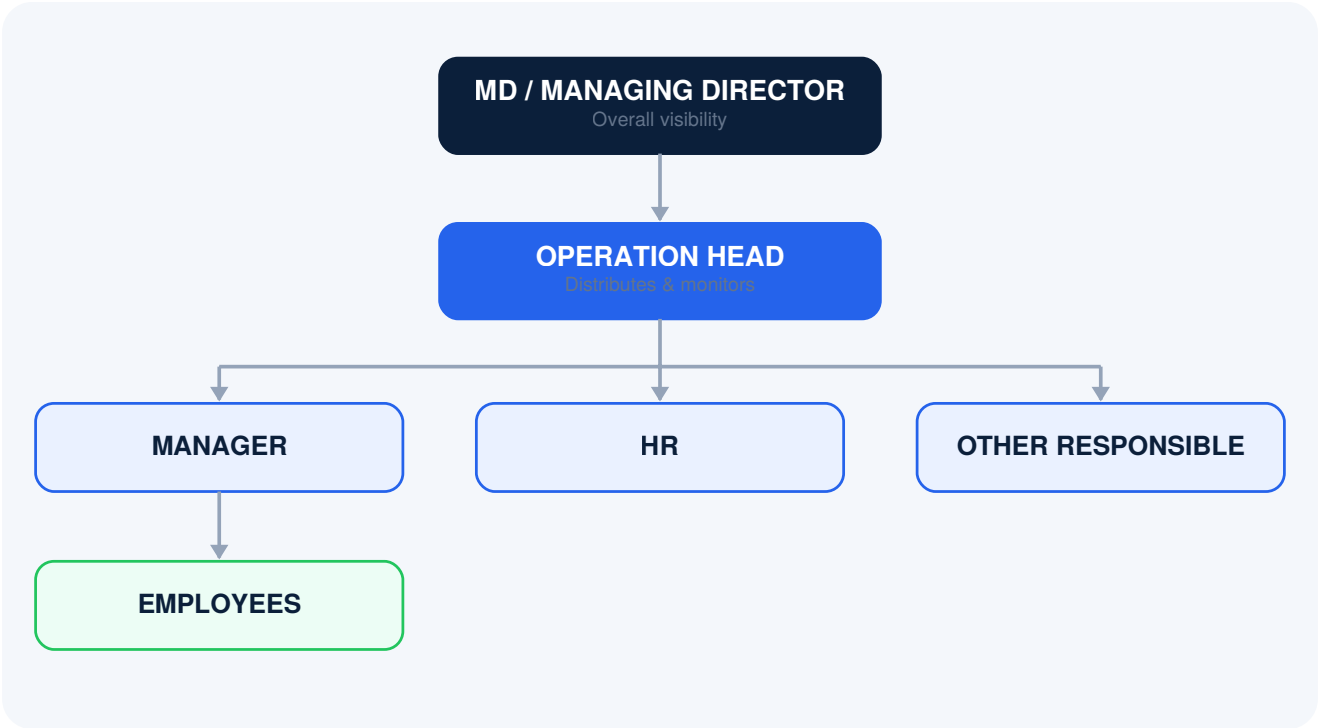

COMPLETE

ANALYZE

Management Structure

The system follows your organization's own reporting structure

MD

Overall visibility. Can assign work directly to any responsible person.

Operation Head

Receives work from the MD, then distributes and monitors operational tasks.

Managers / HR

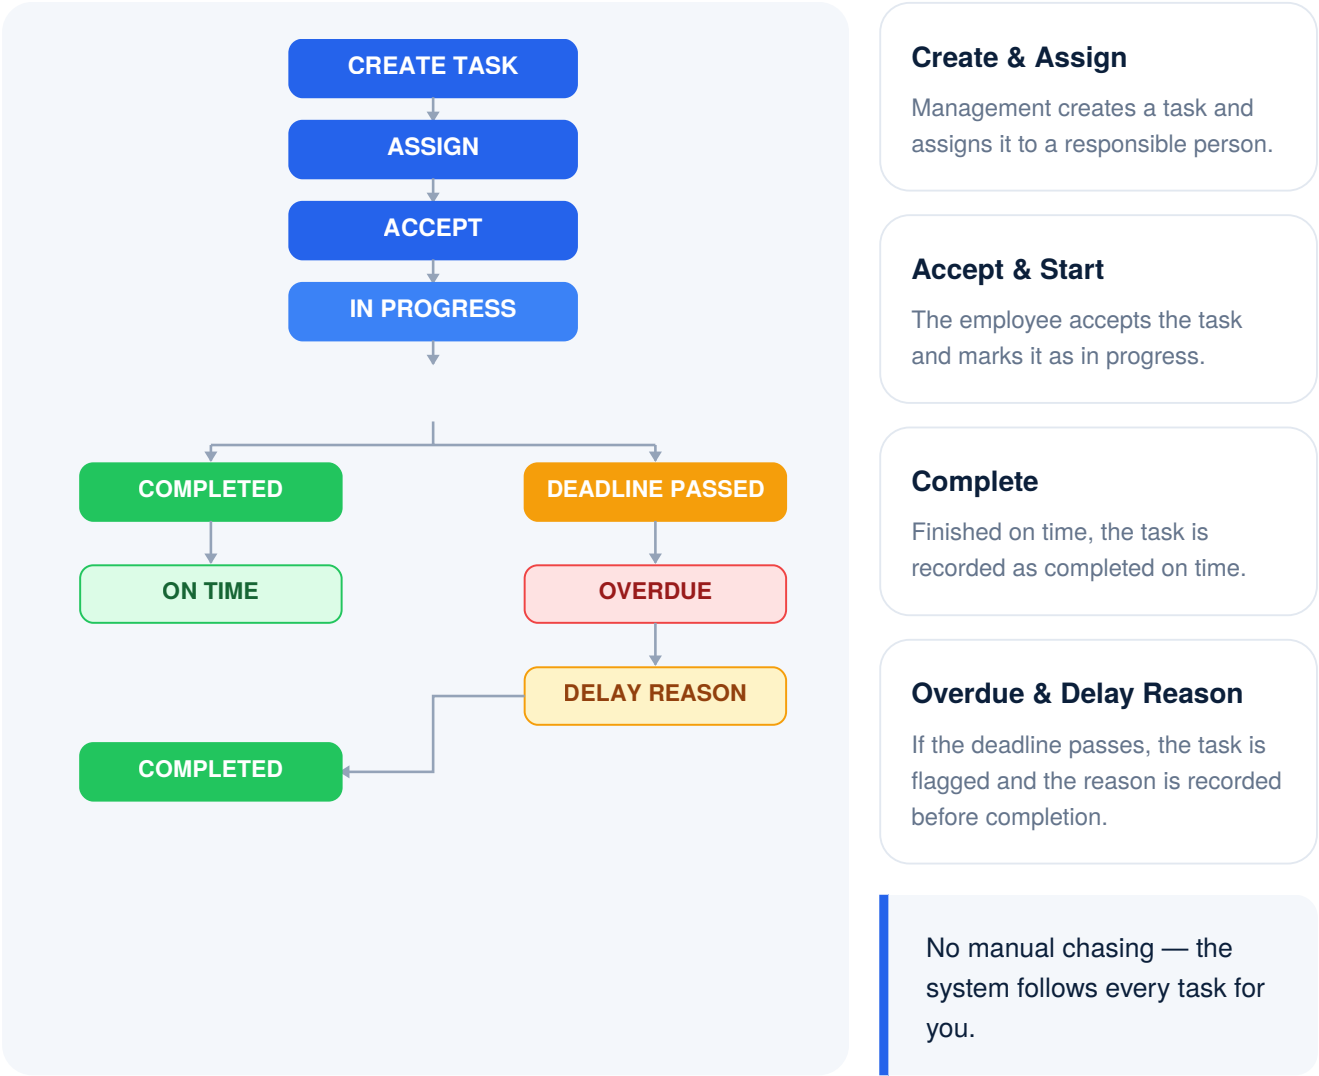

Manage relevant tasks and employees within their own responsibilities.

Employees

View assigned work, update progress, complete tasks and submit daily reports.

How the System Works

The complete task journey, tracked automatically from assignment to completion

Task Management

Every piece of work is captured in one clear, consistent record

Each task contains

- | | |
|----------------------------|-----------------------------|
| T Task title | D Description |
| P Assigned person | B Assigned by |
| G Department / team | ! Priority |
| S Start date | E Deadline |
| C Project / client | A Attachments |
| % Current status | U Comments / updates |

Task status at a glance

- | | |
|---|--|
| Pending
Assigned, not yet started | In Progress
Work is underway |
| Completed
Finished and closed | Overdue
Deadline has passed |
| On Hold
Paused for a reason | Cancelled
No longer required |

Simple, colour-coded statuses mean anyone can understand the state of a task in a second.

05

Deadline & Delay Management

One of the most valuable benefits of the system

Every task has a defined deadline. The system continuously monitors the deadline and identifies tasks that have not been completed on time.

Delay reason options

The responsible employee selects a reason and can add a short explanation.

Waiting for client information

Waiting for approvalTechnical issue

Requirement change

Dependency on another employee

Unexpected urgent workResource issue

Other

EXAMPLE

Client Website Homepage

Deadline: 05 October

OVERDUE

Delay Reason

Waiting for client content

Explanation

Required images and text have not yet been received.

Why it matters

- Delays are visible **immediately**, not after the fact.
- Reasons are **recorded**, so patterns can be understood.
- Management can **act early** to remove blockers.

06

Daily Employee Reporting

A simple two-stage routine: plan the day, then report the result

MORNING REPORT

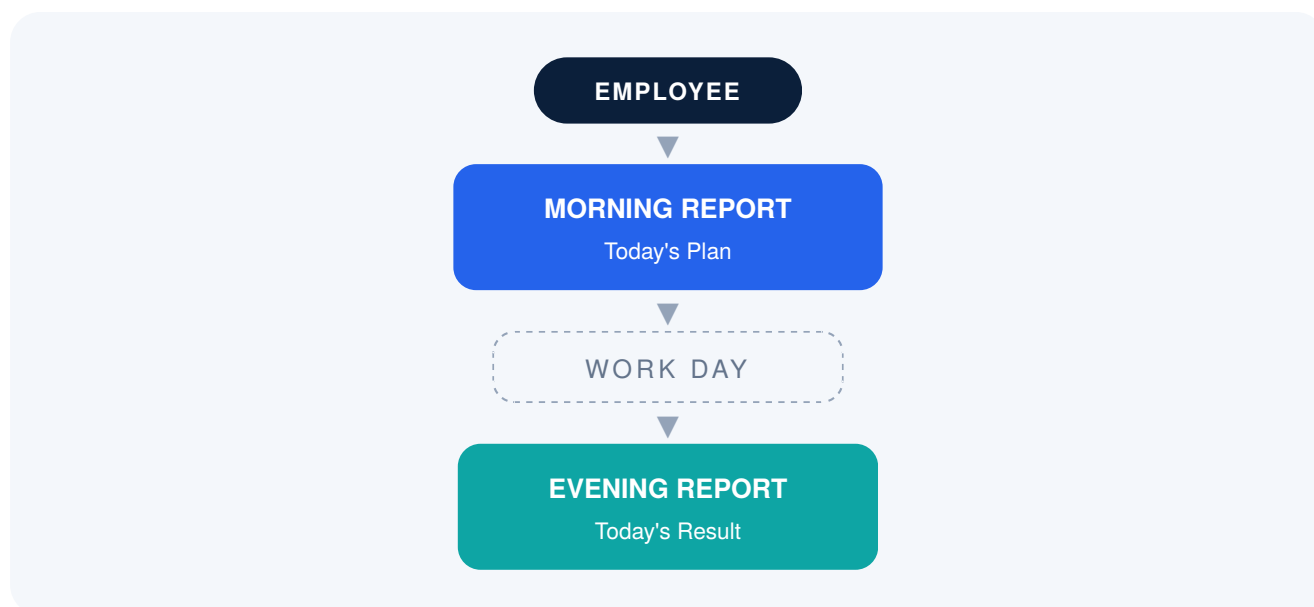

Today's Plan

- Today's priorities
- Planned work
- Important tasks
- Current blockers

END-OF-DAY REPORT

Today's Result

- Completed work
- Ongoing work
- Pending work
- Problems / blockers
- Reason for incomplete tasks

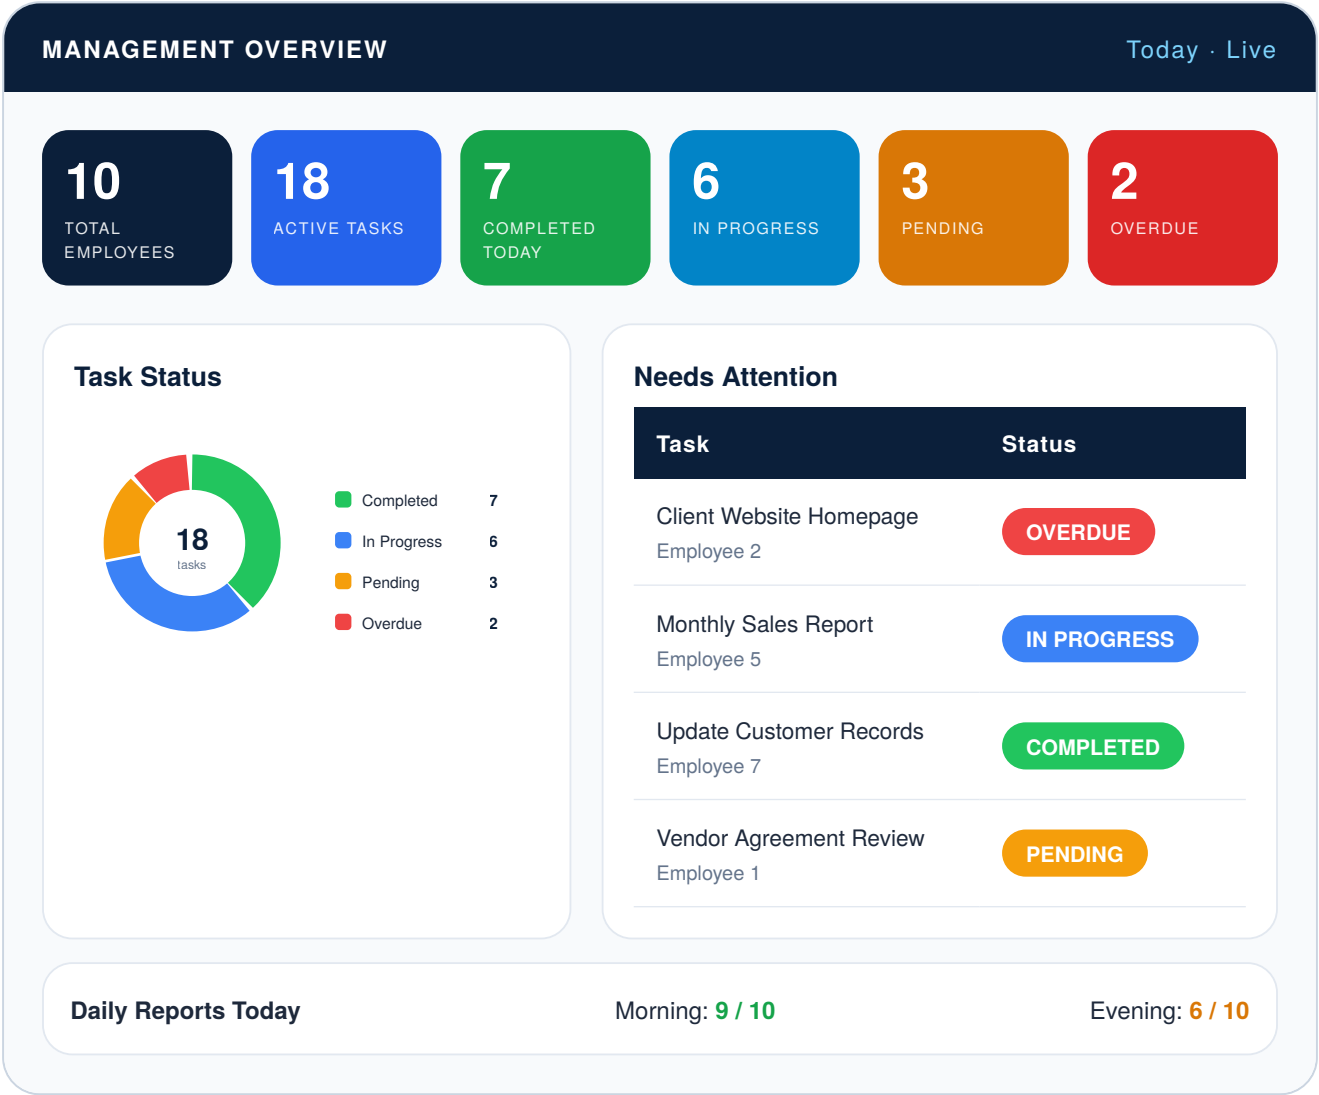

Management sees both **planned work** and **actual work completed**, and can instantly tell who has not yet submitted a report.

Management Dashboard

A conceptual view of what management would see on opening the system

ILLUSTRATIVE DASHBOARD EXAMPLE

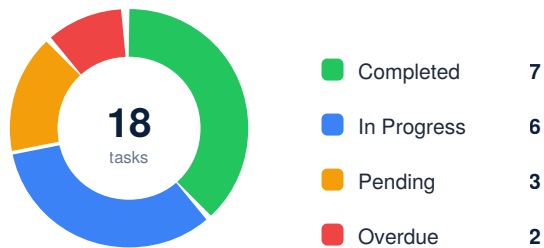

Figures shown are examples only and do not represent actual company data. The final design will be finalized together with the client.

Visual Analytics

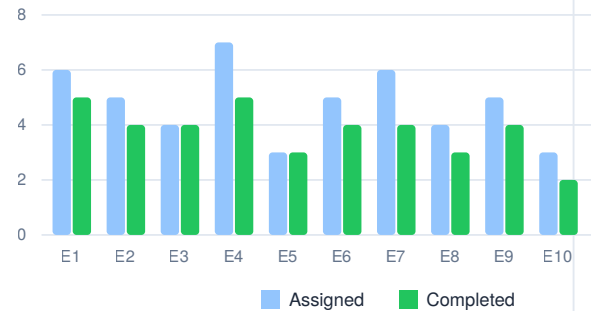

Charts that turn daily activity into clear management insight

Task Status Distribution

ILLUSTRATIVE DATA

Employee Workload: Assigned vs Completed

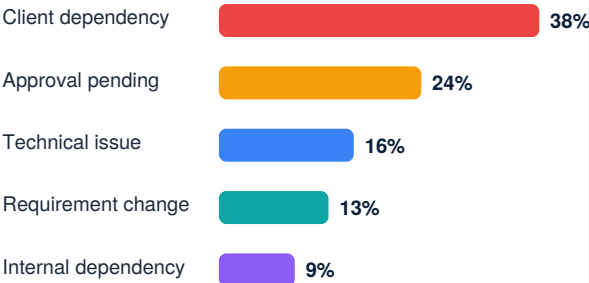

ILLUSTRATIVE DATA

Task Completion Trend

ILLUSTRATIVE DATA

Delay Reason Analysis

ILLUSTRATIVE DATA

Please note: all numbers in these charts are **illustrative data**. They show what the system could display and are **not** actual company performance data.

09

Employee Dashboard

Simple and easy to use: employees see only what they need

ILLUSTRATIVE EXAMPLE

My Tasks

Task	Priority	Deadline	Status
Client Website Update	High	3:00 PM	In Progress
Prepare Report	Medium	5:00 PM	Pending
Data Update	Low	Completed	Completed

TODAY'S REPORT
Morning done

PENDING TASKS
1

COMPLETED TASKS

10

Management Visibility

Seven questions, answered immediately

WHO?
Who is responsible?

WHAT?
What work is assigned?

WHEN?
When is it due?

STATUS?
What is the current progress?

DELAY?
Is the work delayed?

WHY?
Why was it delayed?

REPORT?
Did the employee submit today's report?

11

Reporting & Analytics

Management reports at daily, weekly and monthly levels

Daily Overview

- Employee reporting
- Tasks assigned
- Tasks completed
- Pending tasks
- Overdue tasks

Weekly Overview

- Employee activity
- Task completion
- Delayed tasks
- Delay reasons
- Department activity

Monthly Overview

- Overall work activity
- Completion trends
- Delayed work
- Employee workload
- Department activity

Reports can be designed for **Excel / PDF export** as part of the solution or as a future enhancement.

12

Key Business Benefits

What the system delivers for your organization

A

Accountability

Every task has a clear responsible person and deadline.

T

Transparency

Management sees the current status of organizational work.

L

Less Manual Follow-Up

Monitor progress without repeatedly asking for updates.

!

Early Delay Detection

Overdue tasks are immediately visible.

R

Structured Reporting

A consistent daily reporting process for everyone.

D

Better Decisions

Use actual operational data, not only verbal updates.

13

Future Scalability

Start simple, grow when you are ready

The initial solution remains simple and focused. As your organization grows, it can be expanded. The items below are **future possibilities**, not requirements of the initial version.

14

Proposed Solution Summary

ONE CENTRAL SYSTEM

People + Tasks + Deadlines + Progress + Delays + Reports

The proposed platform gives management a centralized view of organizational activities and helps create a more structured, accountable and transparent working environment.

The goal is simple: give management a clear view of what is happening, who is responsible, what has been completed, and what requires attention.
